Common Core State Standards Texas Essential Knowledge and Skills (TEKS) Virginia Standards of Learning (SOL) BC Performance Standards Alberta Program of Studies The Australian Curriculum (ACARA) The Victorian Curriculum (F-10) Here is a graphic preview for all of the Mixed Problems Worksheets. You select different variables to customize these mixed-problem worksheets to your needs. Mixed problem worksheets are created randomly and never repeated, leaving you with an endless supply of high-quality mixed-use worksheets to use in class or at home. Our Mixed Problems Worksheets are free to download, easy to use and very flexible. These mixed problems worksheets are a great resource for children in kindergarten, 1st grade, 2nd grade, 3rd grade, 4th grade, and 5th grade. Click here for a detailed description of all the mixed problems worksheets. Click the image to take to that Mixed Problems worksheet. Single Digit for Addition, Subtraction, & Multiplication Mixed Problems Worksheets These single-digit worksheets are configured for 2 numbers in a vertical problem format. The range of numbers used for each worksheet can be varied individually to generate different sets of mixed operator problems. Single Digit for Addition, Subtraction, & Multiplication Mixed Problems Worksheets These mixed-digit worksheets are configured for 2 numbers in a vertical problem format. The range of numbers used for each worksheet can be varied individually to generate different sets of mixed operator problems. Add & subtract with Dots Mixed Problems Worksheets These mixed problems worksheets will have 12 vertical issues with dots on the right side of each number to help the kids add up or The range of numbers used for each worksheet can be varied individually to generate different sets of problems. Multiplying worksheets with one or more digits for addition, subtraction, / Multiply Mixed problems These mixed-problem worksheets can be configured for one- or multiple-digit worksheets problems with 2 numbers. Select between 12 and 30 issues to display on each worksheet. Solving equality comparisons Mixed problems worksheets These mixed problem worksheets are great for testing students on solving equalities in a comparison. You select four different variants of the location for the unknown. Select 12, 16, and 20 issues to display on each worksheet. 1 or 2 Grade - 4 Numbers for Add and Subtract Worksheets Mixed Problems These mixed-problem worksheets add and subtract four numbers in a horizontal format with one of the specified numbers. You choose between 12 & 24 issues that appear on each worksheet. Add mixed-problem worksheets and subtract mixed-use worksheets, these mixed-problem worksheets can be configured to add and subtract 2, 3, and 4-digit problems in a vertical format. For the subtraction problems, select a regrouping, no regrouping, all regrouping or subtraction over zero. You select up to 30 mixed issues per worksheet. Add and subtract worksheets with mixed problems from 4, 5, or 6-digit worksheets These mixed-problem worksheets can be configured to add and subtract 4.5 and 6-digit issues in a vertical format. For the subtraction problems, select a regrouping, no regrouping, all regrouping or subtraction over zero. You select up to 30 mixed issues per worksheet. Add & subtract mixed-use worksheets without regrouping. The withdrawal problems can be configured with 2 digits (plus/min) 1 digit problems or 2 digits (plus/min) 2 digit problems. No regrouping option can be disabled if any regrouping is desired. The problem layout is vertical and you select up to 30 mixed issues per worksheet. Add mixed problem worksheets & subtract decimal numbers mixed worksheets These mixed problem worksheets can be configured for 1, 2, and 3 digits to the right of the decimal and up to 4 digits to the left of the decimal. You select up to 25 mixed issues per worksheet. Add or subtract mixed problems Worksheets These mixed problem worksheets can be configured in any problem for up to 4 digits. The currency symbol can be selected from dollar, pound, euro and yen. You select up to 25 mixed issues per worksheet. Negative numbers for addition, subtraction, & multiply Mixed Problems Worksheets These mixed problems worksheets can be configured for horizontal or multiple-digit horizontal problems. The numbers can be selected to positively, mixed. You can vary the number of problems on each worksheet from 12 to 30. Missing numbers for addition, subtraction, multiplication, and Division Mixed Problems Worksheets These mixed problems worksheets are a good introduction to algebra concepts. You different types of species replacing the missing numbers. The sizes of the problems are horizontal and the numbers range from 0 to 99. You select up to 30 mixed issues per worksheet. 1 or 5 minutes of drilling for addition, subtraction, multiplication and Division Mixed Problems Worksheets These mixed problems worksheets are for timed exercises. They include single-digit, subtract, multiply, and share problems on a single page. A student who has memorized all these problems with a single digit should be able to work out these mixed problems correctly in the time allowed. You select which operations you want to use and also vary the number range. Add or subtract missing grades Mixed Problems Worksheets These mixed-problem worksheets are configured for a vertical troubleshooting format. The missing digits are randomly selected to challenge the children to solve the problems. The number of digits in each problem can vary between 2 and 4. You select up to 30 mixed issues per worksheet. Irregular units add or subtract mixed problems These mixed problems worksheets are great for teaching children to add and subtract irregular units of measurement. The issues can be selected as Feet & Inches, Pounds & Ounces, Hours & Minutes and Minutes & Seconds. These mixed-problem worksheets cause 15 problems per worksheet. Mixed-problem worksheets add, subtract, multiply, and divide two numbers These mixed-problem worksheets can be configured to add, subtract, multiply, and divide two numbers. You select different digits for the addition and subtraction of problems. You implement the addition problems as well as regroup and subtract about zero in the subtraction problems. The number of digits may vary in the multiplicand as well as the multiplier for the multiplication problems. The division problems have five different digit configuration to choose from and you select whether the problems have leftovers or not. These problems will be produced in a vertical format for addition, subtraction and multiplication, and standard long distribution format. These mixed problems worksheets will cause six problems for each type of operation for a total

of 24 problems. Add, subtract, multiply, and divide two fractions, these mixed-problem worksheets are ideal for adding, subtracting, multiplying, and dividing two fractions on the same worksheet. You choose between three different difficulty levels and randomize or keep to the operations for the problems. These mixed problems worksheets will produce 12 problems per page. Worksheets & Math Grade 5 Addition & Subtraction Our Grade 5 give additional practice in the addition and subtraction of large numbers. Example Missing addends (3 terms)  $\_\_\_ + 21 + 53 = 138$  Missing addends (5 terms)  $68 + 37 + 1,000 + \_\_\_\_ + 11 = 1,559$  Missing Missing (3 & 4 digit numbers)  $383 + \_\_\_\_ + 1,170$  Add 4 numbers in columns  $355,678 + 43,211 + 784,526 + 12,377$  add 5 numbers in columns  $61,878 + 886 + 928,822 + 90,320 + 1,111$  Add large numbers, 4 addends  $9,098,988 + 7,899,999 + 6,998,987 + 938,929$  Large numbers add, 6 addends  $3,783,500 + 98,090,099 + 84,900,989 + 90,504,850 + 98,988,999 + 9,893,894$  Missing minuend or subtrahend problems  $\_\_\_\_\_\_ - 348 = 1,797$  Large numbers subtracting in columns  $999,098,291 - 991,827,328$  4 operations - mixed word problems Add sample quality 5 Worksheet
